Name: Jordi Rosell Foxa

Email: Jordi.Rosell@uab.cat

Teachers

Lourdes Viladomiu Canela

Didac Cubeiro Rodriguez

Gemma Francés Tudel

Use of languages

Principal working language: spanish (spa)

External teachers

Josep Manel Brañas

Prerequisites

Basic knowledge of economy

Objectives and Contextualisation

Introduce students to different aspects of the economy of China and the European Union.

With regard to China, issues such as reforms in the Chinese economy after the death of Mao, Chinese domestic and foreign trade, presence in world markets and future prospects of the Chinese economy.

A vision of the economic relations between the European Union and China and the bilateral agreements that govern them will also be offered.

With regard to the European Union, a story of the evolution of the main features of the European economy after World War II is presented with special attention to the process of regional economic integration (European Economic Community, European Union and Economic and Monetary Union). The basic features of the Spanish economy are also given special attention to the structural elements and emphasizing the current economic situation.

Likewise, the student will be introduced to the management of tourism in the European Union for the Chinese market and vice versa explaining the importance that this has in the economy.

Skills

- Analyse the economic, social and cultural characteristics of the current-day European Union and China and be able to interpret the changes that both have undergone.
- Analyse the impact of the interrelation between the development of China's emerging economy and the EU's model for economic development.
- Carry out team work in interdisciplinary and multicultural environments.
- Continue the learning process, to a large extent autonomously.
- Make creative and original contributions in distinct fields, demonstrating an attitude of respect towards the opinions, values, behaviour and practices of others.
- Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.

Learning outcomes

1. Carry out team work in interdisciplinary and multicultural environments.
2. Continue the learning process, to a large extent autonomously.
3. Distinguish the impact of Chinese economic development on the economic sphere of the European Union.
4. Evaluate the role of Chinese economic development within international economic relations in the 21st century.
5. Identify the differentiating features in the cultural expressions of the European Union and China.
6. Interpret changes in the economic structures undergone by these two regions in the first decade of the 21st century and the main trends in economic models to be developed over the next decade.
7. Interpret the models of economic development models in the two regions.
8. Make creative and original contributions in distinct fields, demonstrating an attitude of respect towards the opinions, values, behaviour and practices of others.
9. Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.

Content

Economic relations between the EU and China

Economy and Social Relations

 The differential character of the crisis in Spain (2008-14)

Methodology

Master classes / exhibitions
 Case resolution classes
 Discussions
 Seminars
 Presentation / oral presentation of works
 Reading articles / books / reports of interest
 On-line tutorials
 Carrying out individual works
 Possible visits to entities or companies

Activities

Title	Hours	ECTS	Learning outcomes
Type: Directed			
Seminars and face-to-face classes. Debates and exhibitions	75	3	3, 5, 6, 7, 2, 9
Type: Supervised			
Exercises for readings, correction of exercises and resolution of doubts, face-to-face and online tutoring	25	1	3, 8, 5, 6, 7, 2, 1, 4
Type: Autonomous			
Reading and working on articles, books and texts, preparation of activities, and reading comprehension and acquisition. Search for information.	125	5	3, 8, 5, 6, 7, 2, 9, 1, 4

Evaluation

This module does not have a second call, but there is a second chance if the final grade is between 4.0 to 4.9 according to the UAB regulations.

The qualification will be NOT AVALUABLE when the student has not been presented to 75% of the evaluable activities.

According to the regulations approved by the Academic Management Committee of the FTI, and ratified by the Board of Faculty on June 9, 2010, the subject can only be recovered in the following cases:

- When, in a justified way, the student has not been presented to 25-30% of the activities evaluable;
- When the final grade, including the mark for the key competency of the subject, prior to the minutes is between 4.0 and 4.9.

In both cases the student will be presented exclusively to activities or tests not presented or suspended.

The proof of suspended evidence for copying or plagiarism is excluded from the recovery of the note.

In no case may a note be recovered by means of a final test equivalent to 100% of the note.

In the event that there are several irregularities in the evaluation activities of the same subject, the final grade of this subject will be 0. The proof of suspension of the evidence suspended for copying or plagiarism will be excluded. It is considered as a "copy" a work that reproduces all or most of the work of one or more partners, and as "plagiarism" the fact of presenting a part or a whole text of an author as its own, that is to say, without mentioning the sources, it is published on paper or in digital form on the Internet. Copying and plagiarism are intellectual robberies and, therefore, they constitute a fault that will be punished with the "zero" note. In the case of a copy between two students, if it is not possible to know who copied who, the two students will be punished.

Evaluation activities

Title	Weighting	Hours	ECTS	Learning outcomes
Delivery of reports / individual works	25%	50	2	8, 5, 6, 2, 9, 1
Delivery of reports / work in groups.	25%	50	2	8, 1
Final exam	40%	12.5	0.5	3, 5, 6, 7, 2, 9, 4
Individual oral presentations in class	10%	37.5	1.5	3, 8, 5, 6, 7, 2, 9, 1, 4
